Engineering Manager – Seeding/Planting & Tillage

Buhler Ezee-On Inc, a leading and growing manufacturer of farm equipment, is currently accepting applications for an **Engineering Manager** for seeding/planting & tillage equipment, based out of Vegreville, AB.

As an Engineering Manager, you will provide leadership and mentoring to the Engineering department and manage all projects to ensure goals are met. You will be responsible for product design from initial concept through design, prototype building, testing and production, product reliability improvements, cost reduction, and resourcing. Other duties include coordinating new design implementation and modifications to existing products, assisting with the implementation of Corporate Engineering processes, providing support to Manufacturing regarding design related issues, liaising with OEM customers, Production, Sales, Quality and Service.

The successful candidate will have 5-10 years of design experience and a minimum of 2 years experience in a management capacity. This is an ideal position for a highly motivated individual who possesses strong planning skills and the ability to manage deadlines while multi-tasking daily priorities in a fast paced environment. Experience with seeding, planting and tillage equipment is required, and a background in agricultural equipment is strongly preferred. Travel will be required.

We offer competitive salary and benefits. Please forward your resume in confidence to:
