2009 Review

www.a-m-c.ca

What did AMC do in 2009?

- Developed regional classes and fee for service training
- Offer training that will have a significant effect (Supervisor, OHC, Safety Management System) for free to all 310-10 firms
- Offer site specific activities (inspections, gap analysis, audits, JHA, etc)

Where is CASH Certification going?

- Incentives? Not likely and certainly not in the near future
- We strongly recommend either (better both) a Gap Analysis and perception surveys

Issues

- Some of the medical establishment and their non-support of Return to Work
- WCB in Saskatchewan and AMC continue to discuss the manner in which the safety association is governed / set-up

Issues

We want your suggestions and input!
