

As we work together to overcome the current COVID-19 pandemic, let it be known that Walinga's first priority is the health and wellbeing of our staff, customers and associates.

Although the International border has been closed to most traffic, some of our truck drivers will still be required to cross the border. In order to ensure we are doing everything we can to stop the spread of COVID-19 please ensure all truck drivers are following the steps:

1. All trucks must have a hand sanitizer in them.
2. Drivers must sanitize their hands after entering and before exiting the truck.
3. All trucks must have a cleaner in them and drivers must wipe down the commonly touched surfaces (steering wheel, door handle, etc.) prior to departure from each facility.
4. When returning to our Facilities drivers must limit the time spent in our buildings to only required tasks, and not wander throughout the shop.
5. Logistics must ensure paperwork is ready to pass off to drivers, to ensure they are not waiting around inside.

Thank you for your understanding and cooperation.
